Vaccination - Booster			New Zealand	
* Country or Jurisdiction Administered ** NR = Not Recorded				

This document details the COVID-19 vaccinations included on your official health record.

If overseas vaccinations are included, these have been entered based on evidence provided from the country of administration.

Your COVID-19 Vaccination Record can be used as evidence of your vaccinations if required by an employer – including under the New Zealand vaccine mandate. However, it cannot be used instead of a My Vaccine Pass or an International Travel Certificate.

For overseas travel you will still need an International Travel Certificate that complies with EU Digital COVID Certificate standards.
