Having a wide range of expertise in different fields makes me a great asset to any team that I work with. I bring these diverse skills, experience and expertise to all projects. I am curious, hands on and a natural problem solver. The main technologies I use are: HTML, CSS, Javascript, React. I'm also learning Three.js and Gatsby.js. I hope to contribute to impactful change through a career in technology.

Work Experience

Front-end Developer - The Red Bow   Feb/2022
Volunteering with a new charity helping them build their website on Squarespace.
- Maintaining good, open and clear communication with the team.
- Providing advice with UX/UI for their website.

Full-stack Developer - Enspiral Dev Academy   Aug/2020 - Dec/2020

Web development bootcamp, 15 weeks of intense learning, run as a web development environment focused on agile practices and problem solving.

- Adaptability . Each project will be worked with different people and code pairing with a new person on every exercise.

- Practice 'active listening' and support to my team members.

- Deliver full stack projects using agile methods.

Web Developer - Freelancer   Jun/2015 - Nov/2015
Develop briefs with clients and build websites that have a user friendly experience.
- Using coding languages as HTML, CSS, Javascript, JQuery, Bootstrap
- Use of programs like Affinity Publisher, Affinity Designer and Affinity Photo.
- Time management and to prioritize tasks.

Flight Attendant - Air New Zealand   Nov/2015 - Jul/2020
Maintain the safety of passengers and cabin from all possible emergency situations; asses and maintain cabin security;
- Verify that the cabin has the necessary equipment.
- Customer service, always making passengers feel comfortable.
- Time management and working as a team while maintaining safety regulations.
- Adaptability, changing duties and responsibilities on each flight.

 As regional flight attendant:
- Solo charge and make every decision on every flight.
- Look after up to 50 passengers on each flight.
